

Those Women Who Dread Middle Life

Atchison, Kans.: "I took Dr. Pierce's Favorite Prescription during expectancy and it was a great help to me. It was the means of keeping me in good condition and when I came to middle life I took it again and it brought me through this period safely. I am always glad to recommend Dr. Pierce's Favorite Prescription."—MRS. C. C. HINES, 825 Mound St.

After long experience in the treatment of women's diseases, Dr. Pierce evolved a vegetable tonic and corrective which he called Dr. Pierce's Favorite Prescription. This is a purely vegetable preparation, without a particle of alcohol contained in it.

When a woman complains of backache, dizziness or pain—when everything looks black before her eyes—a dragging feeling, or bearing-down, with nervousness, she should turn to this "temperance" herbal tonic. It can be obtained in almost every drug store in the land and the ingredients are printed in plain English on the wrapper. Put up in tablets or liquid. Dr. Pierce, of Invalids' Hotel, Buffalo, N. Y., will send a trial size of the tablets for ten cents.

When Weak and Nervous

Kansas City, Kans.: "I have taken Dr. Pierce's Favorite Prescription many times with very good results. I have taken it for woman's weakness when I was all run-down, weak and nervous and it soon had me built up in health and strength. I have taken it at different times as a tonic and it has never failed to give relief. I have also recommended it to others who have been wonderfully benefited by its use."

"As I have done lots of nursing I am in a position to know that 'Favorite Prescription' has saved the life of many a woman."—MRS. A. GEHRIGER, 1402 Wood Ave.

THE "BLUES"

Caused by
Acid-Stomach

Millions of people who worry, are despondent, have a sense of mental depression, feel blue and are often melancholy, believe that these conditions are due to outside influences over which they have little or no control. Nearly always, however, they can be traced to an internal source—acid-stomach. Now it is to be wondered at. Acid-stomach, beginning with such well defined symptoms as indigestion, belching, heartburn, bloating, etc., will, if not checked, in time affect to some degree or other all the vital organs. The nervous system becomes deranged. Digestion suffers. The blood is impoverished. Health and strength are undermined. The victim of acid-stomach, although he may not know the cause of his ailments, feels his hope, courage, ambition and energy slipping. And truly life is dark and without much to the man or woman who has acid-stomach!

Get rid of it! Don't let acid-stomach hold you back, wreck your health, make your days miserable, make you a victim of the "blues" and gloomy thoughts! There is a marvelous modern remedy called EATONIC that brings, oh! such quick relief from your stomach misery—sets your stomach to rights—makes it strong, cool, sweet and comfortable. Helps you get back your strength, vigor, vitality, enthusiasm and good cheer. So many thousands upon thousands of sufferers have used EATONIC with such marvellously helpful results that we are sure you will feel the same way if you will just give it a trial. Get a big 45-cent box of EATONIC—the good tasting tablets that you eat like a bit of candy—from your druggist today. He will return your money if results are not even more than you expect.

EATONIC
(FOR YOUR ACID-STOMACH)
BETTER DEAD

Life is a burden when the body is racked with pain. Everything worries and the victim becomes despondent and downhearted. To bring back the sunshine take

**GOLD MEDAL
HARLEM OIL
CAPSULES**

The national remedy of Holland for over 200 years; it is an enemy of all pains resulting from kidney, liver and uric acid troubles. All druggists, three sizes. Look for the name Gold Medal on every box and accept no imitation.

Mother Gray's Powders Benefit Many Children

Thousands of Mothers have found MOTHER GRAY'S SWEET POWDERS an excellent remedy for children complaining of Headaches, Colds, Constipation, Feverishness, Stomach Troubles and Bowel Irregularities from which children suffer at this season. These powders are easy and pleasant to take and excellent results are accomplished by their use. Used by Mothers for over 30 years. Sold by Druggists everywhere. Trial package FREE. Address, THE MOTHER GRAY CO., Le Roy, N. Y.

Money back without question if HUNT'S BALVE fails in the treatment of ITCH, BURNING, RASHES, ETC. Itching skin diseases. Price 25c. At druggists, or direct from A. E. Hunt, Buffalo, N. Y.

HESSIAN FLY THREATENS WINTER WHEAT

The HESSIAN FLY

This pest lives through the winter in the bases of the wheat stalks as pupae in small brown cases resembling flaxseeds.

In spring the winged flies emerge from the injured wheat and fly to healthy wheat where they lay their eggs in rows on the leaves. From the eggs hatch tiny maggots that crawl down within the bases of the leaves, feed there on the plant sap, mature, and change again to pupae by harvest time.

These pupae remain in the stubble and, unless the stubble is plowed under, will form a second generation of flies in the fall. These flies leave the stubble and look for young winter wheat on which to lay their eggs.

THIS and THIS are the TWO VITAL POINTS for the CONTROL of the Hessian fly.

Plow under deeply all infested wheat stubble during summer or early fall where this is practicable and does not interfere with the growing of clover or important forage grasses.

If volunteer wheat starts kill it by disk or plow while it is still young.

Postpone sowing winter wheat until the safe date—so that none of the plants will appear above ground until after the flies have died.

Sowing on this date usually insures largest yields in seasons of normal rainfall.

Consult your county agent or State Agricultural College regarding the safe sowing dates for your region.

(Prepared by the United States Department of Agriculture.)

Serious injury to the winter wheat crop of 1920 by the Hessian fly seems extremely probable. Reports received by the United States department of agriculture entomological experts in the Mississippi basin winter wheat region indicate a rapid increase of the Hessian fly in that important wheat-growing district. These reports show that considerable young wheat already has been killed by the Hessian fly, and that serious losses to the crop of 1920 are almost certain.

Unless winter wheat growers east of the Rocky mountains can be induced to unite in a concerted movement to observe the approved methods of combating the Hessian fly during the summer and fall of 1920, it seems that a disastrous general outbreak of the pest very probably will occur in 1921.

A shortage of farm labor and unfavorable weather conditions at planting time have combined to influence many wheat growers in planting their grain too early in the season. This has resulted in a heavy infestation of Hessian fly in practically all of this early planted wheat.

Damage Feared in East.

A dangerously heavy infestation of Hessian fly also exists in the Piedmont plain wheat regions lying east of the Appalachian mountains and embracing Maryland, Virginia and eastern Pennsylvania. Complaints of serious Hessian fly damage in that region have already begun to be heard, and there is at present every indication that early-sown wheat in these states will be considerably if not seriously reduced in yield this year.

There is no remedy for the Hessian fly when once it takes possession of a crop of wheat. Grain that is so heavily infested as to afford little promise of a profitable yield should be deeply plowed down and lightly harrowed as early in the spring as is practicable. This should be done by March 1, if possible, so as to bury the stubble and prevent a large part of the flies from hatching and reinfesting other fields of growing wheat or barley. The land may then be planted to oats, corn or other immune, quick-growing crops, so as to avoid a complete loss of profit from the land during the current year.

How to Fight the Fly.

The methods for combating the Hessian fly are, in brief, as follows:

1. Practice crop rotation. Do not sow wheat on stubble if it is possible to avoid doing so.
2. Plow under all infested stubble, where possible, soon after harvest.
3. Destroy all volunteer wheat by harrowing, disking, plowing or some other method.
4. Plow all land to be sown to wheat as early and deeply as existing conditions permit, and prepare a thoroughly pulverized and compacted seedbed.
5. Conserve moisture against a period of drought at seeding time.
6. Use good seed.
7. Fertilize.
8. Sow wheat during the fly-free period as advised by your farm advisor or state experiment station.

Adhere to these practices every year whether the fly is abundant or scarce. They will help to keep it scarce.

Community co-operation is essential if success is to be attained, because one infested field may furnish enough flies to damage the wheat for several miles around.

KEEP PASTURES PRODUCTIVE

Occasional Application of Manure and Fertilizer Will Supply Needed Plantfood.

The spreading of manure and applying fertilizer to the pasture occasionally will keep it in a good healthy and profitably productive state by supplying plantfood that is drawn from the soil to produce the grass crop which each season is grazed off.

bus discovered America have been identified.

The development of varieties of sweet potatoes for stock feed, sirup, starch and sugar making is under way, and the preliminary results secured indicate that the possibilities of the sweet potato have hardly been touched upon. It is yet too soon to say just what may be expected from this work, but the results thus far secured are very promising. This work is being done at Arlington Farm, Va., and at the Pee Dee experiment station, Florence, S. C.

Investigational work in curing sweet potatoes has also brought out important results. It was shown that with proper handling in storage conditions sweet potatoes can be carried through the winter and as late as April 1 with not more than 1 per cent of loss from decay.

Better Farm Poultry.

The average farm flock can be almost doubled in value by using better birds for breeding. This is true of the production of poultry for their meat as well as for eggs.

Thousands of Happy Housewives in WESTERN CANADA

are helping their husbands to prosper—are glad they encouraged them to go where they could make a home of their own—save paying rent and reduce cost of living—where they could reach prosperity and independence by buying on easy terms.

Fertile Land at \$15 to \$30 an Acre

—land similar to that which through many years has yielded from 20 to 40 bushels of wheat to the acre. Hundreds of farmers in Western Canada have raised crops in a single season worth more than the whole cost of their land. With such crops come prosperity, independence, good homes, and all the comforts and conveniences which make for happy living.

Farm Gardens—Poultry—Dairying

are sources of income second only to grain growing and stock raising. Good climate, good neighbors, churches, schools, rural telephone, etc. give you the opportunities of a new land with the conveniences of old settled districts.

For illustrated literature, maps, description of farm opportunities in Manitoba, Saskatchewan, and Alberta, reduced railway rates, etc., write Department of Immigration, Ottawa, Can., or

The Price of Sweets.

Miss Pansy Pyetin wanted to give a party that would show that her folks didn't mind expense, so her father suggested an old-fashioned taffy pulling.

RECIPE FOR GRAY HAIR.

To half pint of water add 1 oz. Bay Rum, a small box of Barbo Compound, and 1/4 oz. of glycerine. Apply to the hair twice a week until it becomes the desired shade. Any druggist can put this up or you can mix it at home at very little cost. It will gradually darken streaked, faded gray hair, and will make harsh hair soft and glossy. It will not color the scalp, is not sticky or greasy, and does not rub off.—Adv.

Forbidden.

He—Will you have some cafe au lait.

She—Won't we be pinched if we try it?

The Ice.

An amusing incident occurred at a living bridge tournament.

A well-known woman who was impersonating the queen of hearts was accosted by a fellow performer whose accent suggested that her cradle had stood within sound of Bow Bells.

"I'm looking for the ices," she said.

"Have you seen them?"

"Ices?" said the queen of hearts.

"Are there any ices? How delightful! I'm horribly thirsty!"

"I don't mean those kind of ices," was the rather hurt rejoinder. "I'm looking for the ice of spades!"—London Tit-Bits.

Crown Balm.

When General Pershing arrived in Washington after his return from France he had with him a trunk containing a mass of medals, citations and ribbons and the correspondence concerning it. Attaches of the war department were detailed to go through the material. They had not gone far when they ran across this memorandum which bore the signature of one of the general's aids and a date several months old:

"The King of — was here yesterday and left a couple of medals."

In one corner of the memorandum, over the initials of the C-in-C, was this pencilled notation:

"Write him something pretty."

A Hint.

Senator LaFollette said of a profiteering street railway corporation:

"This corporation could learn a lesson from Japan."

"In a Japanese town a street railway was some time ago set up, and after it had been running a few years a great discovery was made. This discovery, well known to the western world, was that the straphanger pays the dividends."

"But the Japanese street railway line carried the discovery right out to its logical conclusion. Perceiving that a much bigger cargo could be carried standing than sitting, it did away with seats altogether, and now, to the great benefit of the line's exchequer, all its patrons without exception are straphangers."

Good Prescription at That.

"I shall never call that doctor again."

"What's the matter? Didn't his advice suit you?"

"Not at all. It was insulting."

"In what way?"

"He had the effrontery to suggest that it would do me a lot of good if I'd quit taking life easy and go to work."

Hard Work Tires muscles and nerves, and then to whip them with coffee, with its drug caffeine, makes a bad matter worse.

POSTUM CEREAL

is a drink for workers that contains no drug, but furnishes a finely flavored beverage, full-bodied and robust, pleasing to former coffee drinkers.
